

# Green Cross Hygiene Foot Care Cream

(Sure Cure For Cracked Heels)

Special External Formula with Extra Ordinary Fragrance...

Urea IP 10% w/w  
Lactic Acid IP 10% w/w  
Propylene Glycol IP 10% w/w  
Liquid Paraffin IP 10%

## MECHANISM OF ACTION:

Green Cross Hygiene Foot care Cream acts in three ways:

- a) It retains moisture in the epidermis, replenishing urea and lactic acid levels.
- b) It repairs the physical barrier of the skin thus eliminating moisture loss through the epidermis.
- c) It reduces the thickness and softens the harsh skin of the soles, especially heels.

Essential to the efficacy of the product is the fact that lactic acid is the leading hydrating factor most frequently recommended by dermatologists for the treatment of dry skin.

## INDICATIONS:

Fast acting relief for cracked heels, roughness & dryness of the feet.  
Works as an emollient & skin freshener.

## DIRECTIONS FOR USE:

Green Cross Hygiene Foot care Creams should be applied as an even layer over the affected area. Washing the skin before applying the Green Cross Hygiene Foot care Cream will greatly improve the effectiveness of the product. Wash & pat dry the feet, preferably with lukewarm water. Apply over effected area twice daily, once in the morning after bath & before going to bed in the night. Spread gently. Allow 15 minutes to dry. Please avoid washing the skin immediately after applying the Cream. This special formula heals faster, soothes, smoothes and moisturizes the skin.

## STORAGE:

Refrigeration of GREEN CROSS HYGIENE FOOT CARE CREAM is recommended for long term storage (more than 1 year).  
For regular use, keep cap tightly closed and store in a dry and cool place away from light exposure.

## WARNINGS:

Avoid contact with eyes.
